

THE STORY OF OUR ZERO WASTE KITCHEN

By FERMENT SPACE

In a world where convenience often wins, we chose a different path —
one rooted in intention, integrity, and deep respect for the Earth.

At Ferment Space, our kitchen is more than a place to prepare food — it's a living, breathing part of our philosophy. We believe that what nourishes us should never harm the planet. It's a living, breathing part of our philosophy.

*We make everything in-house —
we choose organic whenever!*

NO MSG

NO GMOs

No harsh chemicals

We also don't use any chemical sprays on our land. That means you might see ants or little bugs walking by — and that's okay. They're part of this space too. We do our best to keep things clean, safe, and beautiful without disrupting the balance of nature.

In our zero-waste kitchen, we see *value in everything*:

Banana peels?
Turned into vinegar.

Carrot tops?
Used in broths.

Leftover ferments?
Shared with the soil to feed our gardens.

We compost. We grow.
We give back.

We feed some leftovers to our chickens.
Nothing goes to waste, everything has a purpose.

This is slow living.

This is conscious community.

This is what happens when we choose to live in harmony, not just with each other, but with the earth beneath our feet.

Our kitchen is our *love letter* to the planet — and to you.
Thank you for being part of this journey.

With heart,
FERMENT SPACE
